

25, WILTON PLACE.  
S.W.

Oct 2/73

My dear Gray

I sent for you to Wesley last week (addressed Herbarium Harvard University) a copy of the new volume of my Flora Australasica

When I received yours of the 4<sup>th</sup> Sept I answered immediately about the 16<sup>th</sup> for vol. XII of the London Journal. but now find there are other points I did not answer. I shall be very glad to receive what is due to you from Reeve & Co and pay any matters out of it besides what you owe me or remit the balance to you in any way you may direct

I think I understood Rippon that

you paid for the four copies of vol  
 XIII which is now complete - The first  
 2 of vol XIV is printing Do you stop  
 the copy that Torrey had or only  
 Bullivant - and if Torrey's is still  
 to be sent I suppose it must be  
 to "Columbia College New York"  
 but it will not be sent unless you  
 give instructions

In reply to the enclosure from W  
 Wright I must say that the authority  
 of the names of new species ought to  
 have been more clearly expressed in  
 the title page or to each name - As it is  
 most people will take them as if  
 Hooker did to be "Cuvillier", he being  
 given as the author of the catalogue  
 and there being no intimation of  
 the origin or descriptive names  
 being Wright's. I may call by will  
 be sent (Cuvillier) A.S.

My *Lycium* (*Acacia* group) *Sahamensis* is the true  
*Minora latifolia* diu to which the latter with correctly  
 referred Regel's specimens from Red West Florida and  
 becomes *Lycium latifolia*

Many thanks for the sheets you  
 sent - the latter ones we had already  
 the Seguinian ones came just in  
 time Our copy still wants

Pl. 41-40

177-200

209-216

Are complete copies on sale anywhere?

The following are corrections to some  
 of Griseb's <sup>other</sup> *Minoreas* from Cuba

- *Minora diplotricha* Wright = *M. indivis*  
 Hook. (*Schrankia brachycarpa* Death. & Gray)
- *Acacia tamarindifolia* Griseb. from W. Lang  
 from: *Minora polycaultra*, Death.
- *Leptadenia stenadenia* Griseb. = *Leptadenia*  
*mutans* Death.
- *Leucaena formosa* Griseb. = *Lycium labicii* A. N. S.
- *Calliandra hystrix* } = *Orthocloeum*  
*hystrix* Nutt.
- *Orthocloeum calliandrae* }  
*hystrix* Nutt.
- *Calliandra revoluta* Griseb. = *Orthocloeum*  
*obovale* Death. (*Eugenia obovata* A. N. S.!)

*Lycium Marchiana* Griseb. H. B. K. W. L. W. L.  
 is nothing but *Calliandra perfloricans*

Your very sincerely

George Donnell
